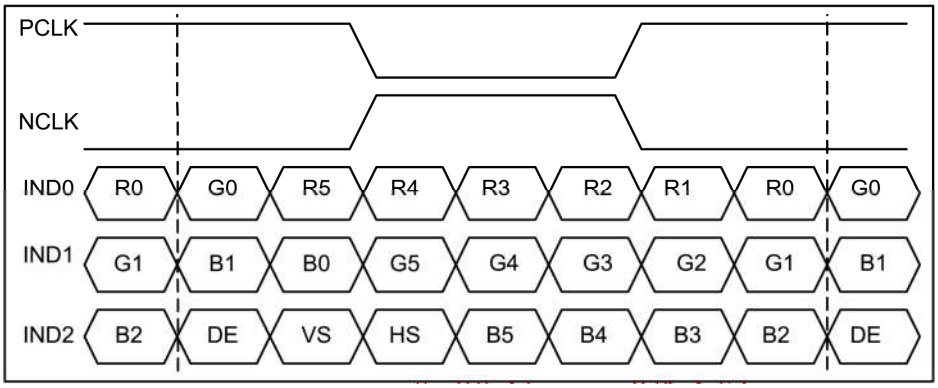
Output High Voltage	V_{OH}	0.8VCC	-	VCC	V	Digital output pins
Output Low Voltage	V_{OL}	GND	-	0.2VCC	V	Digital output pins
I/O Leak Current	I_{LI}	-1.0	-	1.0	uA	-

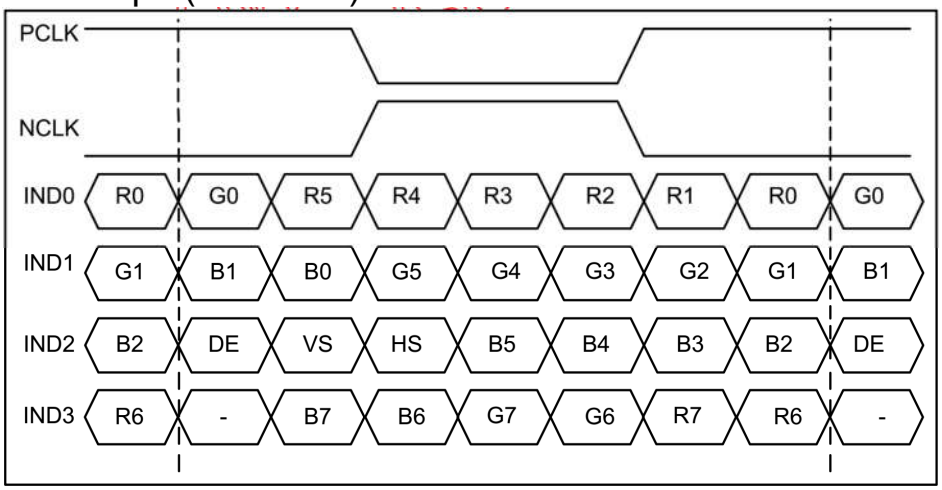
7. Timing Characteristics

7.1 Data Input Format for LVDS

6-bit LVDS input(HSD="H")



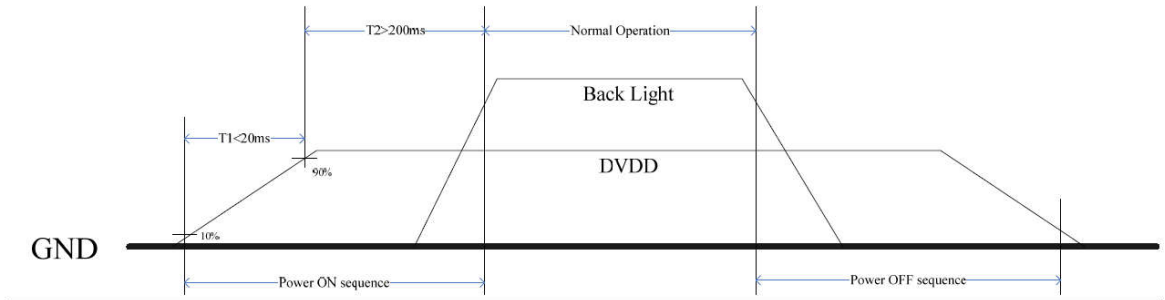
8-bit LVDS input(HSD="H")

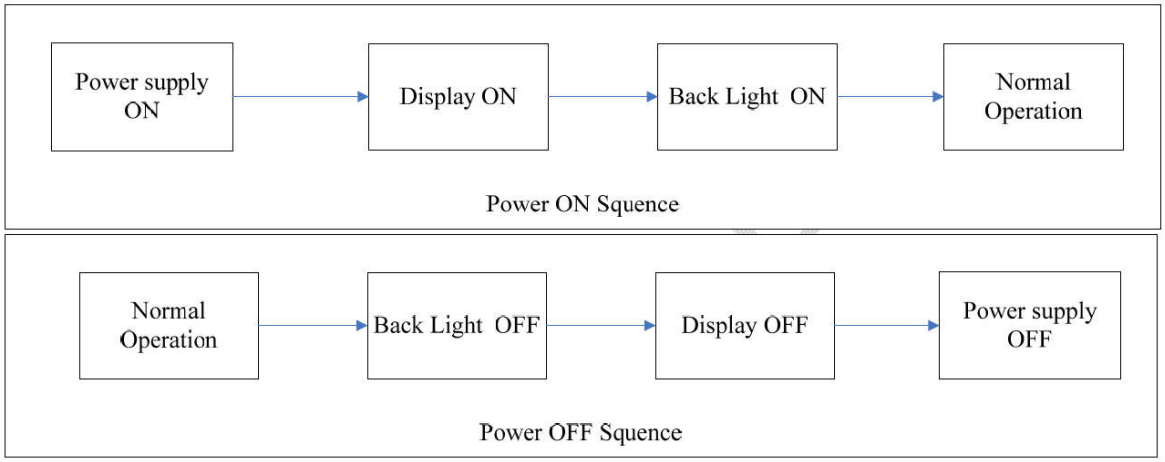


7.2 Timing

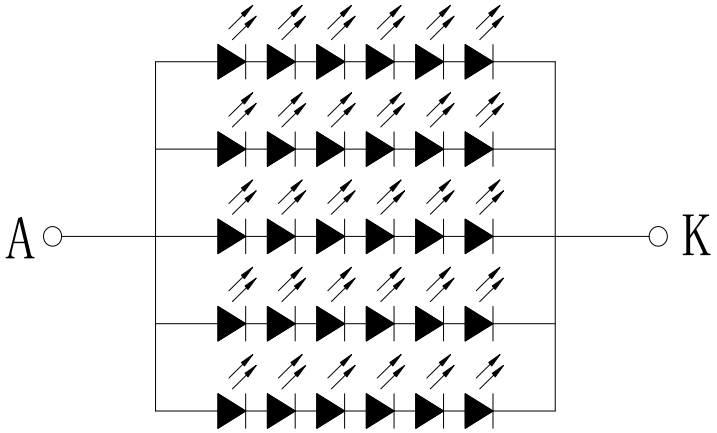
Parameter	Symbol	Min	Typ	Max	Unit	Remark
Clock frequency	fclk	40.8	51.2	67.2	MHz	Frame rate=60Hz
Horizontal display area	thd		1024		DCLK	
HS period time	th	1114	1344	1400	DCLK	
HS Blanking	thbp+thfp	90	320	376	DCLK	
Vertical display area	tvd		600		H	
VS period time	tv	610	635	800	H	
VS Blanking	tvbp+tvfp	10	35	200	H	

7.3 POWER ON/OFF SEQUENCE





8. Backlight Charasterics

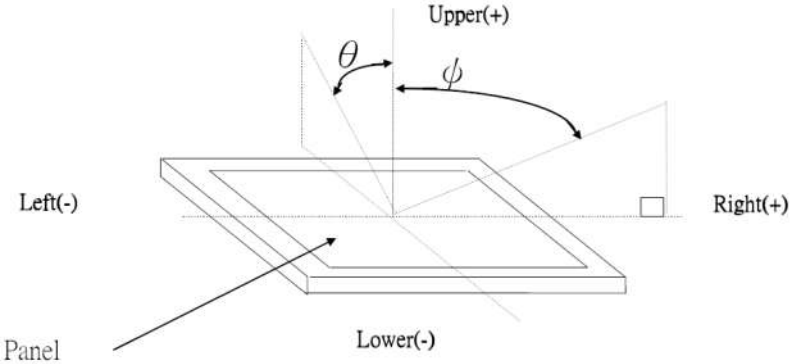


Item	Symbol	MIN	TYP	MAX	UNIT	Test Condition
Supply Voltage	Vf	18.0	19.2	20.4	V	If=100mA
Supply Current	If	-	100	-	mA	-
Luminous Intensity for LCM	-	260	300	-	Cd/m^2	If=100mA
Life Time	-	20000	-	-	Hr	If=100mA
Backlight Color	White					

9. Optical Characteristics

Parameter		Symbol	Condition	Min.	Typ.	Max.	Unit	Remark
Viewing Angle range	Horizontal	Θ_3	CR > 10	-	85	-	Deg.	WV-Pol Note 1
		Θ_9		-	85	-	Deg.	
	Vertical	Θ_{12}		-	85	-	Deg.	
		Θ_6		-	85	-	Deg.	
Luminance Contrast ratio		CR	Θ = 0°	-	800	-		Note 2
Cell Transmittance		Tr		4.8	5.0	-	%	Base on C Light Note 3
White Chromaticity		x_w		TYP. - 0.03	0.308	TYP. + 0.03		Note 4 Base on C Light
		y_w			0.336			
Reproduction of color (C light)	Red	R_x			0.599			
		R_y			0.338			
	Green	G_x			0.299			
		G_y			0.550			
	Blue	B_x			0.139			
		B_y			0.131			
Color Gamut (C light)				-	50	-	%	
Response Time (Rising + Falling)		T_{RT}	Ta= 25° C Θ = 0°	-	30	40	ms	Note 5

Note 1. Definition of view angle(θ，ψ)：



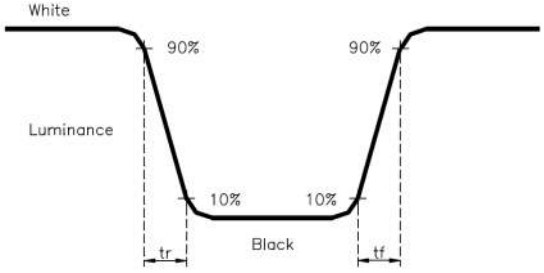
Note 2. Definition of Contrast Ratio：

CR = White Luminance (ON) / Black Luminance (OFF)

Note 3. Transmittance is the Value with Polarizer.

Note 4. The color chromaticity coordinates specified in Table 6 shall be calculated from the spectral data measured with all pixels first in red, green, blue and white. Measurements shall be made at the center of the panel.

Note 5. The electro-optical response time measurements shall be made as FIGURE 6 by switching the “data” input signal ON and OFF. The times needed for the luminance to change from 10% to 90% is Tr, and 90% to 10% is Td.



10. Reliability Test Conditions And Methods

NO.	TEST ITEMS	TEST CONDITION	INSPECTION AFTER TEST
①	High Temperature Storage	80℃±2℃×96Hours	Inspection after 2~4hours storage at room temperature,the samples should be free from defects: 1,Air bublle in the LCD. 2,Sealleak. 3,Non-display. 4,Missing segments. 5,Glass crack. 6,Current IDD is twice higher than initial value. 7,The surface shall be free from damage. 8,The electric charateristic requirements shall be satisfied.
②	Low Temperature Storage	-30℃±2℃×96Hours	
③	High Temperature Operating	70℃±2℃×96Hours	
④	Low Temperature Operating	-20℃±2℃×96Hours	
⑤	Temperature Cycle(Storage)	-20℃ ⟺ 25℃ ⟺ 70℃ (30min) (5min) (30min) 1cycle Total 10cycle	
⑥	Damp Proof Test (Storage)	50℃±5℃×90%RH×96Hours	
⑦	Vibration Test	Frequency:10Hz~55Hz~10Hz Amplitude:1.5M X,Y,Z direction for total 3hours (Packing Condition)	
⑧	Drooping Test	Drop to the ground from 1M height one time every side of carton. (Packing Condition)	
⑨	ESD Test	Voltage:±8KV,R:330Ω,C:150PF,Air Mode,10times	

REMARK:
1,The Test samples should be applied to only one test item.
2,Sample side for each test item is 5~10pcs.
3,For Damp Proof Test,Pure water(Resistance＞10MΩ)should be used.
4,In case of malfunction defect caused by ESD damage,if it would be recovered to normal state after resetting,it would be judge as a good part.
5,EL evaluation should be excepted from reliability test with humidity and temperature:Some defects such as black spot/blemish can happen by natural chemical reaction with humidity and Fluorescence EL has.
6,Failure Judgment Criterion:Basic Specification Electrical Characteristic,Mechanical Characteristic,Optical Characteristic.

11. Inspection Standard

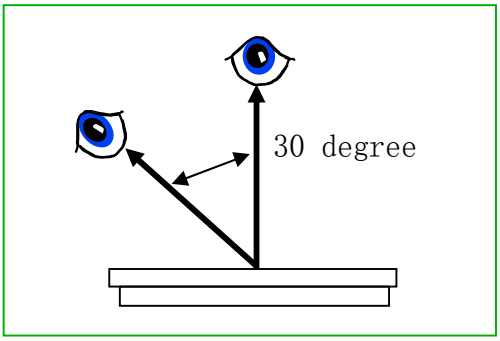
This standard apply to C-STN/TFT module

1. **Spot check plan：**

According to spot check level Ⅱ,MIL-STD-105D Level Ⅱ,the rank of accept or reject is below:

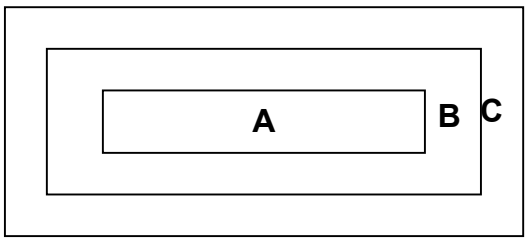
A 级：major non-conformance： AQL 0.65 minor non-conformance： AQL 1.

2. **Inspection condition：**



Under daylight lamp 20～40W，product distance inspector'eye 30cm,incline degree 30°。

3. **LCD area define：**



Area A：display area

Area B：VA area

Area C：out of VA area,not in sight after assemby

Remark :non-conformance at area C,but is OK that isn't influence raliability of product & assembly by customer.

4. Inspection standard

4.1 Major non-conformance

NO.	Item	Inspection standard	Rate
4.1.1	Function non-conformance	1) No display,display abnormaly 2) Miss line, short 3) B/L no function or function abnormaly 4) TP no function	major
4.1.2	miss	No matter miss what component	
4.1.3	Out of size	Module dimension out of spec	

4.2 Appearance non-conformance

12. Handling Precautions

12.1 Mounting method

The LCD panel of LTK LCD module consists of two thin glass plates with polarizes which easily be damaged. And since the module in so constructed as to be fixed by utilizing fitting holes in the printed circuit board.

Extreme care should be needed when handling the LCD modules.

12.2 Caution of LCD handling and cleaning

When cleaning the display surface, Use soft cloth with solvent [recommended below] and wipe lightly

- Isopropyl alcohol
- Ethyl alcohol

Do not wipe the display surface with dry or hard materials that will damage the polarizer surface.

Do not use the following solvent:

- Water
- Aromatics

Do not wipe ITO pad area with the dry or hard materials that will damage the ITO patterns

Do not use the following solvent on the pad or prevent it from being contaminated:

- Soldering flux
- Chlorine (Cl) , Salfur (S)

If goods were sent without being sili8con coated on the pad, ITO patterns could be damaged due to the corrosion as time goes on.

If ITO corrosion happen by miss-handling or using some materials such as Chlorine (CI), Salfur (S) from customer, Responsibility is on customer.

12.3 Caution against static charge

The LCD module use C-MOS LSI drivers, so we recommended that you:

Connect any unused input terminal to Vdd or Vss, do not input any signals before power is turned on, and ground your body, work/assembly areas, assembly equipment to protect against static electricity.

12.4 packing

- Module employ LCD elements and must be treated as such.
- Avoid intense shock and falls from a height.
- To prevent modules from degradation, do not operate or store them exposed direct to sunshine or high temperature/humidity

12.5 Caution for operation

- It is an indispensable condition to drive LCD's within the specified voltage limit since the higher voltage then the limit cause the shorter LCD life.
- An electrochemical reaction due to direct current causes LCD's undesirable deterioration, so that the use of direct current drive should be avoided.
- Response time will be extremely delayed at lower temperature then the operating temperature range and on the other hand at higher temperature LCD's how dark color in them. However those phenomena do not mean malfunction or out of order with LCD's, which will come back in the specified operation temperature.
- If the display area is pushed hard during operation, some font will be abnormally displayed but it resumes normal condition after turning off once.
- A slight dew depositing on terminals is a cause for electro-chemical reaction resulting in terminal open circuit.

Usage under the maximum operating temperature, 50%Rh or less is required.

12.6 storage

In the case of storing for a long period of time for instance, for years for the purpose or replacement use, the following ways are recommended.

- Storage in a polyethylene bag with the opening sealed so as not to enter fresh air outside in it . And with no desiccant.
- Placing in a dark place where neither exposure to direct sunlight nor light's keeping the storage temperature range.
- Storing with no touch on polarizer surface by the anything else.
  [It is recommended to store them as they have been contained in the inner container at the time of delivery from us

12.7 Safety

- It is recommendable to crash damaged or unnecessary LCD's into pieces and wash off liquid crystal by either of solvents such as acetone and ethanol, which should be burned up later.
- When any liquid leaked out of a damaged glass cell comes in contact with your hands, please wash it off well with soap and water

13. Precaution For Use

13.1

A limit sample should be provided by the both parties on an occasion when the both parties agreed its necessity. Judgment by a limit sample shall take effect after the limit sample has been established and confirmed by the both parties.

13.2

On the following occasions, the handing of problem should be decided through discussion and agreement between responsible of the both parties.

- When a question is arisen in this specification
- When a new problem is arisen which is not specified in this specifications
- When an inspection specifications change or operating condition change in customer is reported to LTK LCD , and some problem is arisen in this specification due to the change
- When a new problem is arisen at the customer's operating set for sample evaluation in the customer site.

14. Packing Method

TBD

15.Introduction to Product Application

1.Application Industrial control, video intercom, instrumentation,medical equipment, security monitoring, vehicle display, bank bill acceptance instruments, POS machines and other occasions.

2,Features

1.1,Support HDMI（Version 1.1），VGA(Common resolutions: 640*480,800*480,800*600,1024*600,1024*768，1280*800), CVBS

1.2,Input Voltage :DC +12V（9V-15V）

1.3, Multi-function OSD, support brightness, contrast and other parameter adjustment

1.4,Support remote control function

1.5,Power-on and power-off indicator status

15,Outline structure diagram

1.1 Driver board

Constant temperature and humidity test		+60℃ 90%RH 96 hours of continuous work	2	

Remark：

1、The test shall be carried out under the condition of no condensation;

2、After the test, it needs to be placed in the test box under normal temperature and humidity, and the product can be taken after 24 hours;

20，Barcode Description

Definition / Product name	a	bbbb		cd	ef	gh	ijkl
AHX-PVI35-A	company code	product code	0254	Last 2 digits of year(00-99)	month (01-12)	date(01-31)	Product Serial Number(0001-9999)/day

21,Pledge

.1， The company ensures that all products are qualified and in normal operation, and accepts customer purchase inspections in accordance with the requirements of this specification. If it is found that the product does not meet the technical requirements (except for items negotiated separately), the customer can return the same batch number of products purchased on the same day to Leadtek Electronics Co., Ltd. If any defect is found on the production line, you can request an exchange from Leadtek Electronics Co., Ltd. within 30 days from the acceptance date, but this clause does not apply if the defect is caused by the customer's production line.

2， Leadtek Electronics Co., Ltd. suppliers provide a one-year warranty for related products, counting from the date of delivery. During this period, free repair or replacement is provided for products that are not caused by human factors (within 2 weeks after receipt of the faulty product); for products beyond the

warranty period, or products caused by human factors, the company can provide corresponding maintenance as appropriate , the purchaser shall bear the maintenance materials and corresponding expenses.

22,Performance And Quality Change Notifications

1， If the performance and quality of the product are affected by design or engineering changes, relevant documents must be provided, and production can only be carried out after confirmation by both parties, and the changed specifications or drawings must be attached to the specifications and additionally marked.

2， When the customer's design and process need to be changed, the customer must notify the manufacturer to make the change, and it can be produced after both parties agree to ensure the stability of the process engineering and product quality of both parties.

3， If you use different materials from the specifications, Leadtek Electronics Co., Ltd. needs to submit a change application to the customer before the change, and the change can only be made after the customer approves.

23. Statement

23.1 Leadtek Electronics Co., Ltd. has the right to interpret this acknowledgment.

23.2 This acknowledgment is made in duplicate, one for the customer and one for the supplier, which will take effect from the date of confirmation and signature by both parties.

23.3 If there is any update, it needs to be resolved through negotiation between the two parties and supplemented separately.
